THE ART OF SUSTAINABLE WELLBEING

At onE.Globe, we specialize in sustainable luxury, seamlessly blending opulence with eco-friendly design in both residential and commercial architecture and interiors to enhance user experiences.

Our streamlined workflow leverages cutting-edge technologies:

- Conducting in-depth client interviews to gather essential information.
- Utilizing generative AI and computational design to create various design alternatives.
- Efficiently creating permit and construction documents from the BIM model, with refined details enhanced through virtual reality headsets.

Transform your vision into reality with onE.Globe.

www.one-globe.biz

onE.Globe is revolutionizing real estate, architecture, and interior design with AI-assisted computation. Our custom workflow optimizes the design process, saving time and costs by integrating realistic imagery and 3D models to bring your visions to life.

We then translate these models into precise construction drawings. Unlock the hidden potential of properties with our architectural expertise and innovative, efficient approach.

We combine global insights with local knowledge, treating real estate as a creative art form. This approach allows us to become your trusted partner in developing unique and exceptional spaces tailored to your needs.
